

## 2018 Green Sports Alliance Summit Poster Session

June 26 - June 27, 2018 | Mercedes-Benz Stadium - Atlanta, GA

Application Deadline: April 6th, 2018

### Poster Session:

In 2018, for the first time, the Green Sports Alliance will be hosting a poster session exclusive to Universities, Colleges and other Academic institutions focusing on **sustainability in athletics and/or recreation**. The poster sessions will run throughout the Green Sports Alliance Summit with dedicated time in the conference program for presenting your findings, projects, and successes to Summit attendees.

### 2018 Poster Criteria & Selection Process

The 2018 poster session will be reflective of the Green Sports Alliance Summit theme, **PLAY GREENER™: Get in the Game**, where we'll focus on actionable and collaborative problem-solving to achieve sustainable objectives and change across the sports spectrum.

Poster case-study applicants will be assessed on how well they embody this theme of achieving outcomes, with special consideration on the following areas:

- Clearly defined project and sustainability objectives
- Environmental impact vis-a-vis achieving determined objectives
- Problem solving and informed environmental stewardship
- Engagement with stakeholders and local communities

The format and design of the presentation is largely up to the applicant, the final poster must be 4' x 4' or smaller and printing guidelines will be provided to those selected. Presenters are responsible for creating, printing, transporting, displaying, and taking down posters.

### Application and Selection Process

While design and presentation are subject to your own creativity, to apply, please submit a poster summary of 500 words or less through the following submission portal. Please be clear about the nature of your project, and what you hope to highlight during your presentation.

Poster proposals will be selected for the Alliance Summit, and priority for selection will be given to Alliance collegiate members in good standing.
